*International Conference*

## Standards in Response To Global Challenges: Climate Change, Energy, Water and Nutrition

Under The Auspices of :

H.E. **Rachid M. Rachid**, the Minister of Trade and Industry

Presidency of Dr. **Mahmoud Eisa** EOS President

24 -25 November 2008

# Invitation for Participation in the Conference

In the framework of EOS plan for raising awareness on the important role of standards in conserving the natural resources and encountering the environmental, industrial and service problems facing people, EOS organizes an international conference in collaboration with the Arab Academy for Science and Technology And Maritime Transport on "Standards in Response to Global Challenges Climate Change, Energy, Water and Nutrition" to be held during the period 24-25 November 2008, at Cairo International Convention and Exhibition Centre – Nasr City.

The conference will witness an active participation of top officials of the state and relevant international and regional organizations as well as the Arab and foreign standards bodies, in addition to the participation of Mr. Alan Bryden, ISO Secretary General, through a presentation entitled "International Standards for Sustainable Development : Contributions of ISO". EOS takes this opportunity to invite you kindly to participate through attendance or submitting a research or a presentation on one of the axes or topics contributing to the enrichment of the conference and achievement of the prospective objectives.

## Objectives

- Highlighting the important role of standards in response to climate change, nutrition, water and energy.
- Raising awareness on the importance of standards in conserving the natural resources and facing the environmental, industrial and service problems.
- Providing the opportunity for Egyptian institutions and companies to acquire experience of developed countries through presenting the international and local pioneer models in these fields.
- Coordinating for issuing recommendations so as to encounter challenges related to the impact of climate change on environment, nutrition, water and energy

## Axis

- International standards for sustainable development: contributions of ISO.
- Nature and concept of climate change, nutrition, water and energy.
- Food, water and energy sources – present and future.
- Standards in response to climate change, nutrition, water and energy.
- Latest editions of standards in the area of environmental management systems.
- Latest edition of standards in the area of energy and rationalization of its consumption.
- Latest editions of standards in the area of food safety and water.
- Standards and environmental legislations in response to climate change, nutrition, water and energy.
- Future vision for developing standards in the scope of facing climate change, nutrition, water and energy.

## Date and venue

Cairo International Convention and Exhibition Centre, Nasr City Mycerinos Auditorium

During the period 24-25 November, 2008

Registration: 8.30 am

## Participants

- Top State officials.
- ISO Secretary General.
- Presidents of international and regional organizations for standardization along with foreign and Arab Standards bodies.
- The local and international establishments having appreciation of studying and monitoring climate changes and decreasing of food, water and energy.
- Research centers and universities.
- Industrial organizations, establishments and concerned bodies.

### **Participation through submitting Researches and presentations.**

EOS kindly invites experts and competent institutions and establishments to conduct researches and presentations on the conference axes according to the following:

- Presentation should be within 10 -15 papers.
- Title and abstract of presentation should be submitted within 10 lines.
- Complete presentations should be sent electronically to EOS before 1/11/2008.
